What to Expect: AI in Pedagogical Design & Delivery Workshop

Duration: 2 hours

Audience: School of Marketing & Management faculty

Format: Interactive presentation with hands-on activities

Workshop Overview

This session is designed for educators with varying levels of AI experience—from those who've never used AI tools to those already experimenting with them. Our goal is **AI literacy through practical, hands-on experience**, not technical expertise.

Reading time: 3 minutes

The Day's Structure

Morning Sessions (Separate from this workshop)

- **Assessment Design Session** - How to design assessments that integrate or resist AI
- **Ethics Session** - Ethical considerations in AI-enhanced education

Note: We'll reference these topics but won't cover them in detail, as they're addressed in dedicated morning sessions.

Our Workshop (2 hours)

Part 1: Welcome & Landscape (5 minutes) - Quick energizer and overview of generative AI - No technical jargon—just practical context

Part 2: Automate the Tedious (15 minutes) - Hands-on Activity: Use AI to summarize a complex reading - **Goal:** Experience AI as a time-saving assistant - **You'll try:** Basic prompting for summarization

Part 3: The Art of the Prompt (15 minutes) - Introduction to the CRAFT framework for better prompts - **Hands-on Activity:** Use Microsoft's Prompt Coach tool - **Goal:** Move from basic to strategic prompting

Part 4: Your 5-Step Critique Framework (15 minutes) - Essential quality control for any AI output - **Hands-on Activity:** Apply the framework to previous outputs - **Goal:** Develop critical evaluation skills

Part 5: Assessment Stress-Test (15 minutes) - Hands-on Activity: Test one of your assessments against AI - **Goal:** Understand how AI might interact with your assignments - *Connects to morning assessment session*

Part 6: Secure, Safe & Sustainable AI (10 minutes) - Core tensions: privacy, accuracy, bias, ethics - **Goal:** Understand responsible AI use - *Briefly connects to morning ethics session*

Part 7: Wrap-Up & Next Steps (10 minutes) - Personal AI challenge - Q&A and resources

What You Won't Find Here

Technical deep dives - We're not learning to build AI

One-size-fits-all solutions - AI tools vary by discipline

Mandates or requirements - This is exploratory, not prescriptive

Assessment redesign - That's covered in the morning session

Ethics deep dive - That's also covered in the morning session

What You Will Find Here

Hands-on practice - You'll actually use AI tools
Practical frameworks - CRAFT prompting, 5-step critique
Peer discussion - Learn from colleagues' experiences
Honest limitations - AI isn't perfect, and we'll show why
Starting points - Resources to continue exploring
Judgment-free zone - All experience levels welcome

Pre-Reading Options

For everyone (10-12 minutes): - [What is AI? A Non-Technical Introduction](#) - [What are Large Language Models \(LLMs\)?](#)

For the curious (additional 15 minutes): - [AI in Pedagogical Design & Delivery Overview](#) - [Cognitive Prompting in Education](#) - [Using AI in Education: Roles for Teaching & Research](#)

For the time-pressed: - See our [Quick Start Guide](#) - 5-minute read

What to Bring

- **Your laptop or tablet** - We'll be using AI tools live
 - **One assessment idea** - Something you'd like to test against AI
 - **Your questions** - No question is too basic
 - **Open mind** - AI is evolving rapidly; we're all learning
-

After the Workshop

You'll receive: - PDF handouts: AI Tools Quick Reference & Teaching Strategies - Access to the companion website (in development) - Contact information for follow-up questions - Suggested "first experiments" for your teaching

Questions Before the Workshop?

Contact: michael.borck@curtin.edu.au

Remember: This is a starting point, not a destination. Our goal is to help you take your first (or next) steps with AI in a way that feels manageable and relevant to your teaching context.
