Project Summary: AI in Pedagogical Design and Delivery

Overview

Complete workshop and companion website for building AI literacy among marketing and management faculty. Includes: - Interactive 2-hour workshop with hands-on activities - Companion website with resources and assessment tools - Two-phase assessment strategy (reflective + diagnostic) - Professional HTML/CSS website with responsive design - All materials under CC BY 4.0 license

Repository: <https://github.com/michaelborck-presentations/ai-in-pedagogical-design-and-delivery>

What's Included

1. Workshop Materials

Main Presentation: - ai-pedagogy-presentation.qmd - 7-slide presentation (renders to PPTX/PDF/HTML) - Duration: 2 hours - Activities: 5 hands-on exercises

Handouts & Guides: - `teaching-strategies-handout.md` - Implementation guide after workshop - `ai-what-handout.md` - Quick reference for AI tools - `references.md` - Bibliography and further reading

2. Resources (Pre-Reading Materials)

Essential (Required for new users): - `what-to-expect.md` - Workshop overview and expectations (3 min) - `quick-start-guide.md` - 5-minute essentials (5 min)

Foundation (Recommended): - `what-is-ai.qmd` - AI concepts explained (10 min) - `what-are-llms.qmd` - Large language models explained (12 min)

Advanced (Optional): - `ai-in-pedagogical-design-and-delivery.md` - Pedagogy framework (8 min) - `cognitive-prompting-in-education.md` - Prompting as pedagogy (7 min) - `using-ai-in-education-roles-for-teaching-and-research.md` - AI roles (5 min)

Total reading time: 20-50 minutes (all optional)

3. Assessment Tools

Diagnostic Quiz: - `website/content/assessment/ai-literacy-diagnostic.html` - 15 interactive questions - 4 adaptive profiles (Novice → Advanced) - Instant personalized results - Runs entirely offline - Recommend: Day-of workshop (first 15 minutes)

Reflective Profile: - Design using MS Forms (template in `QUIZ-SETUP-GUIDE.md`) - 10 questions about concerns and motivations - Personalized reading suggestions - Recommend: Send 1 week before workshop

4. Companion Website

Pages: - Landing page (`index.html`) - Resources directory - Materials directory - Assessment hub with quiz - Professional responsive design

Architecture: - Pure HTML/CSS/JavaScript (no build process) - 4 main pages + assessment quiz - 60KB total size - Mobile-friendly - Sticky navigation - Professional gradient theme

Deployment: - Ready for GitHub Pages (from `docs/` folder) - Auto-deploys on push - Live URL: <https://michaelborck-presentations.github.io/ai-in-pedagogical-design-and-delivery/>

5. Documentation

For Users: - QUIZ-SETUP-GUIDE.md - Complete quiz implementation manual - WEBSITE-BUILD-GUIDE.md - Website build and deployment guide - WEBSITE-PLAN.md - Architecture and strategy document - README.md - Project overview

For Developers: - website/README.md - Build instructions - website/content/assessment/README.md - Quiz usage guide - .gitignore - Configured for Quarto, website, and outputs

Quick Start for Different Users

For Workshop Facilitators

1. Read README.md (project overview)
2. Review ai-pedagogy-presentation.qmd (main content)
3. Follow QUIZ-SETUP-GUIDE.md to set up assessments
4. Use WEBSITE-BUILD-GUIDE.md to deploy website locally
5. Share website URL with participants 1 week before

For Participants

1. Optionally read pre-reading materials (20-50 min)
2. Take diagnostic quiz (15 min) on workshop day
3. Attend 2-hour workshop
4. Use teaching-strategies-handout.md for implementation

For Developers/Customizers

1. Read WEBSITE-PLAN.md (understand architecture)
 2. Read WEBSITE-BUILD-GUIDE.md (setup local dev)
 3. Edit files in website/src/ as needed
 4. Test locally: `python -m http.server 8000`
 5. Deploy to GitHub Pages
-

Two-Phase Assessment Strategy

Phase 1: Reflective Profile (Week Before)

- **Tool:** MS Forms (10 questions)
- **Purpose:** Surface anxieties, understand motivations
- **Output:** Personalized reading suggestions
- **Time:** 8-10 minutes

Phase 2: Diagnostic Quiz (Day Of)

- **Tool:** Custom HTML/JavaScript
 - **Purpose:** Measure AI literacy, personalize learning path
 - **Output:** Instant adaptive profile + activity recommendations
 - **Time:** 12-15 minutes
 - **Features:** Offline, no backend, instant results
-

Website Feature Highlights

Design

- Clean, professional gradient theme (purple/indigo)
- Responsive layout (mobile to desktop)
- Card-based components for visual hierarchy
- Consistent typography and spacing

Navigation

- Sticky header nav
- Breadcrumb navigation
- Footer with multiple link categories
- Internal linking throughout

Components

- Hero section with CTA
- Feature cards
- Resource cards with metadata
- Alert boxes (info, success, warning)
- Buttons (primary, secondary, large)
- Badges and tags

Accessibility

- Semantic HTML5
- Proper heading hierarchy
- Color contrast compliance
- Mobile-friendly touch targets

Performance

- ~60KB total (HTML + CSS)
 - No external dependencies
 - Fast loading
 - Works offline (after first load)
-

Deployment Checklist

Before Workshop

- ☐ Test diagnostic quiz locally
- ☐ Create MS Forms Reflective Profile
- ☐ Send Reflective Profile email 1 week prior
- ☐ Test website locally: `python -m http.server 8000`
- ☐ Copy website files to `docs/` folder
- ☐ Push to GitHub (auto-deploys to Pages)
- ☐ Verify live URL is accessible
- ☐ Share website URL with participants
- ☐ Print handouts if needed
- ☐ Test projection setup

During Workshop

- ☐ Start local server for quiz: `python -m http.server 8000`
- ☐ Run quiz first thing (15 min)
- ☐ Reference participants' profiles during activities
- ☐ Note common themes from diagnostic results

After Workshop

- ☐ Send results + personalized recommendations
 - ☐ Include group insights (aggregate data)
 - ☐ Share follow-up resources
 - ☐ Optionally: Set up 3-month re-test
-

Customization Guide

Change Colors

Edit `/website/src/css/style.css`:

```
--primary: #667eea;  
--primary-dark: #764ba2;  
--accent: #f59e0b;
```

Update Content

Edit HTML files directly in `/website/src/`: - `index.html` - Landing page - `resources.html`
- Resources list - `materials.html` - Materials list

Modify Quiz Questions

Edit `/website/content/assessment/ai-literacy-diagnostic.html`: - Search for `<div class="question">` - Edit questions, answers, scoring

Customize Quiz Profiles

In same file, search for `const profiles = {` - Edit profile names, descriptions - Update activity recommendations - Change reading suggestions

Add New Pages

1. Create `website/src/newpage.html`
 2. Copy structure from `index.html`
 3. Update `<nav>` with new links
 4. Add link to new page in other pages' nav
-

Key Documents to Read

1. **README.md** - Start here for project overview
 2. **QUIZ-SETUP-GUIDE.md** - If implementing assessments
 3. **WEBSITE-BUILD-GUIDE.md** - If deploying or modifying website
 4. **WEBSITE-PLAN.md** - If understanding architecture
-

Technical Stack

Frontend: - HTML5 (semantic markup) - CSS3 (CSS Grid, Flexbox, Variables) - Vanilla JavaScript (no frameworks) - No external libraries or dependencies

Build: - Quarto (for rendering presentation) - Git (version control) - GitHub Pages (hosting)

Optional: - Python (local server) - Node.js (alternative local server) - VSCode (text editor)

Support & Customization

Getting Help

- Check WEBSITE-BUILD-GUIDE.md troubleshooting section
- Read relevant .md files for your use case
- Review comments in HTML/CSS files
- Email: michael.borck@curtin.edu.au

Common Customizations

Change workshop date/time: - Edit `website/src/index.html` (hero section)

Change contact email: - Find and replace `michael.borck@curtin.edu.au` throughout

Change institution: - Replace “Curtin University” in files - Update footer and contact info

Add custom resources: - Add links to `website/src/resources.html` - Create new resource cards with metadata

Rebrand: - Change CSS colors - Update logo text (`website/src/index.html`) - Modify footer content

License & Attribution

License: CC BY 4.0 (Creative Commons Attribution)

You can: - Use, adapt, remix, and share these materials - Present the workshop yourself - Modify for your context

You must: - Attribute the original authors (Michael Borck & Curtin University) - Keep the same license on derivatives

Suggested attribution: > Materials adapted from “AI in Pedagogical Design and Delivery” by Michael Borck & Curtin University, licensed under CC BY 4.0

Version History

v1.0 (2025) - Initial release - Complete workshop materials - Companion website - Two-phase assessment system - Documentation and guides

Next Steps

1. **Review** - Read through README.md and QUIZ-SETUP-GUIDE.md
 2. **Customize** - Edit website content for your context
 3. **Test** - Run locally and verify all links work
 4. **Deploy** - Push to GitHub Pages
 5. **Share** - Send pre-reading email 1 week before workshop
 6. **Present** - Run workshop with diagnostic quiz
 7. **Follow-up** - Send results and personalized recommendations
-
