What to Expect: AI in Pedagogical Design & Delivery Workshop

Audience: School of Marketing & Management faculty

Format: Interactive presentation with hands-on activities

Workshop Overview

This session is designed for educators with varying levels of AI experience—from those who’ve never used AI tools to those already experimenting with them. Our goal is **AI literacy through practical, hands-on experience**, not technical expertise.

Part 1: Welcome & Landscape - Quick energizer and overview of generative AI - No technical jargon—just practical context

Part 2: Automate the Tedious - Hands-on Activity: Use AI to summarize a complex reading - **Goal:** Experience AI as a time-saving assistant - **You’ll try:** Basic prompting for summarization

Part 3: The Art of the Prompt - Introduction to the CRAFT framework for better prompts - **Hands-on Activity:** Use Microsoft’s Prompt Coach tool - **Goal:** Move from basic to strategic prompting

Part 4: Your 5-Step Critique Framework - Essential quality control for any AI output - **Hands-on Activity:** Apply the framework to previous outputs - **Goal:** Develop critical evaluation skills

Part 5: Assessment Stress-Test - Hands-on Activity: Test one of your assessments against AI - **Goal:** Understand how AI might interact with your assignments - *Connects to morning assessment session*

Part 6: Secure, Safe & Sustainable AI - Core tensions: privacy, accuracy, bias, ethics - **Goal:** Understand responsible AI use - *Briefly connects to morning ethics session*

Part 7: Wrap-Up & Next Steps - Personal AI challenge - Q&A and resources

What You Won't Find Here

- **Technical deep dives** - We're not learning to build AI
- **One-size-fits-all solutions** - AI tools vary by discipline
- **Mandates or requirements** - This is exploratory, not prescriptive
- **Assessment redesign** - That's covered in the morning session
- **Ethics deep dive** - That's also covered in the morning session

What You Will Find Here

- **Hands-on practice** - You'll actually use AI tools
- **Practical frameworks** - CRAFT prompting, 5-step critique
- **Peer discussion** - Learn from colleagues' experiences
- **Honest limitations** - AI isn't perfect, and we'll show why
- **Starting points** - Resources to continue exploring
- **Judgment-free zone** - All experience levels welcome

Pre-Reading Options

For the time-pressed (5 mins): - See our [Quick Start Guide](#)

For everyone (10-12 mins): - [What is AI? A Non-Technical Introduction](#) - [What are Large Language Models \(LLMs\)?](#)

For the curious (additional 15 minutes): - [AI in Pedagogical Design & Delivery Overview](#) - [Cognitive Prompting in Education](#) - [Using AI in Education: Roles for Teaching & Research](#)

What to Bring

- **Your laptop or tablet** - We'll be using AI tools live
- **One assessment idea** - Something you'd like to test against AI
- **Your questions** - No question is too basic
- **Open mind** - AI is evolving rapidly; we're all learning

Questions Before the Workshop?
